

The Carbon Chronicle

VOLUME 11 NUMBER 6

THE WORLD OVER

DOUKHOBORS LEAVING CANADA

F. ROOSEVELT'S PROCLAMATION

Removal of the Canadian Doukhobor colony, consisting of some 16,000 people in Western Canada, to a new home in Mexico near Monterrey, was forecast by John McDouall, colonization agent of Camden, N.J., who is now en route west with Peter Verigin, spiritual leader of the Doukhobors in Canada.

The two passed through Ottawa on Monday bound for Western Canada Doukhobor settlements where the leader will consult his followers on the Mexican plan, McDouall said.

The colonization agent said he had known Verigin for 20 years and also his father. He represented interests controlling one million acres of arable land near Monterrey, in Mexico, and he believed the Mexican government would welcome the Doukhobor people to that country.

WASHINGTON—March 5—President Franklin Roosevelt tonight issued a proclamation taking absolute command by the United States Government over the nation's gold supply.

The proclamation prohibits hoarding of certain precious metals and prohibits gold and silver exports and prohibits "earmarking" of American gold by foreign nations.

The proclamation also declared a national holiday on banking until Thursday to bridge the gap between now and the time Congress meets.

President also signed a bill in the sweeping declaration for national regulations for the issuance of clearing house certificates.

Immediately upon issuance of the proclamation treasury officials prepared to put it into effect, these certificates will be issued at the regular method of exchange.

The President took his far-sighted action under authority of the Emergency Trading Act enacted in 1917.

GRAND CHALLENGE EVENT

According to Mr. and Mrs. Skerry from Jas. Stone, holding this event into the sixties. Coming into the eighties, Skerry won from McGenie, Greenam from Tricker, A. Poxon from Grainger, and Stone from Garrett. Bessant from Dewees, Torrance from Roberts, Webb from Fairbairn and L. Poxon from F. Poxon. Coming into the forties, the present Skerry has won from Stone and L. Poxon from Webb. In the fifties, L. Poxon from Skerry.

CARBON RINKS WIN MAJORITY 'SPIEL PRIZES

One of the most successful curling bonspiels ever to be held in Carbon was concluded on Friday night after four days of curling, when the finals were played in the Grand Challenge and Blue Ribbon events.

There were seven visiting, and 11 local rinks in the bonspiel which

game resulted. The team was in wonderful condition and no weather prevailed throughout the week, making curling ideal.

Of the local rinks, the "Mick" Skerry aggregation was the sensation of the week and it seemed that the team was the best and most evenly matched out to L. Poxon in the Grand Challenge, and to H. Roberts in the Ontario Laundry connection.

Following are the results of the three competitions played:

Grand Challenge Event

According to Mr. and Mrs. Skerry from Jas. Stone, holding this event into the sixties. Coming into the eighties, Skerry won from McGenie, Greenam from Tricker, A. Poxon from Grainger, and Stone from Garrett. Bessant from Dewees, Torrance from Roberts, Webb from Fairbairn and L. Poxon from F. Poxon. Coming into the forties, the present Skerry has won from Stone and L. Poxon from Webb. In the fifties, L. Poxon from Skerry.

Ontario Laundry Event

Stone won from Torrance and Tricker from Fairbairn. Coming into the eighties Greenam won from Grainger, Roberts from Reid, Bessant from Webb, L. Poxon from J.C. Smith, Garrett from Dewees, and Stone from F. Poxon. Coming into the fifties, Stone was won from Greenam, Roberts from A. Poxon, Bessant from L. Poxon, Skerry from Garrett. For the semi-finals Roberts won from Stone and Skerry from Bessant, and in the final game Roberts won from Skerry.

Blue Ribbon Event

Coming into the eighties, A. Poxon won from Fairbairn, Torrance from Dewees, and Tricker from Reid. For the fours, A. Poxon won from Torrance, Tricker from F. Poxon, Garrett from Dewees, and Stone from F. Poxon. Coming into the fifties, Stone was won from Greenam, Roberts from A. Poxon, Bessant from L. Poxon, Skerry from Garrett. For the semi-finals Roberts won from Stone and Skerry from Bessant, and in the final game Roberts won from Skerry.

Bow River Riding to Do the Disappear Act

Stone won from Torrance and Tricker from Fairbairn. Coming into the eighties Greenam won from Grainger, Roberts from Reid, Bessant from Webb, L. Poxon from J.C. Smith, Garrett from Dewees, and Stone from F. Poxon. Coming into the fifties, Stone was won from Greenam, Roberts from A. Poxon, Bessant from L. Poxon, Skerry from Garrett. For the semi-finals Roberts won from Stone and Skerry from Bessant, and in the final game Roberts won from Skerry.

Establishment of a new federal constituency—Calgary South

Disappearance of the old Bow River riding; Extension of Calgary East to take in much of the territory now covered by the Bow River, taking in the rural areas east of Calgary and extending to the result of the findings of the re-distribution committee of the House of Commons. If given approval of the House, the report has been drafted.

The revision will not involve any change in the members, but Dr. Stanley, instead of representing Calgary East will represent the Calgary South constituency. This will be with坐 to E.J. Garland and the extended Calgary East instead of Bow River, which will be absorbed by extension of Macleod and Calgary East.

As between Calgary East and Calgary South, the new riding to be formed in the urban section of the city. With its western boundary the Alberta-Brith Columbia border and its southern limit Midnapore and extending south of the Canadian Pacific tracks, all the way east and drive through the country and north of the city of Calgary. West has within its boundaries only half of the city of Calgary.

Briefly the arrangement planned is that Bow River will be split, the northern portion going to Calgary East and the southern part divided between Macleod and Calgary South.

Soil Drifting Problem

On Monday, February 20, the wind blew 60 miles an hour for five minutes and averaged 22 miles for the whole hour.

Soil drifting, from which Southern Alberta has been comparatively free for some years, made its appearance and threatens to be a menace of some proportions in the farming areas of Southwestern Alberta this spring, especially in the month of March conditions winds.

On Monday of this week a Calgary Herald man accompanied A.E. Palmer, assistant superintendent of the Experimental Farm, and H.G. Everett, supervisor of illustration studios on a tour of the Monarch, Noldeford and Wainwright districts. Soil drifting was in evidence, but here is what the party found:

—In every field in which strip farming is being carried on, soil drifting is at a minimum, and the damage is practically nil.

—In fields where strip farming is being carried on, soil drifting is at a maximum, and the damage is practically nil.

—In fields where strip farming is being carried on, soil drifting is at a maximum, and the damage is practically nil.

—In fields where strip farming is being carried on, soil drifting is at a maximum, and the damage is practically nil.

—In fields where strip farming is being carried on, soil drifting is at a maximum, and the damage is practically nil.

—In fields where strip farming is being carried on, soil drifting is at a maximum, and the damage is practically nil.

—In fields where strip farming is being carried on, soil drifting is at a maximum, and the damage is practically nil.

—In fields where strip farming is being carried on, soil drifting is at a maximum, and the damage is practically nil.

—In fields where strip farming is being carried on, soil drifting is at a maximum, and the damage is practically nil.

—In fields where strip farming is being carried on, soil drifting is at a maximum, and the damage is practically nil.

—In fields where strip farming is being carried on, soil drifting is at a maximum, and the damage is practically nil.

—In fields where strip farming is being carried on, soil drifting is at a maximum, and the damage is practically nil.

—In fields where strip farming is being carried on, soil drifting is at a maximum, and the damage is practically nil.

—In fields where strip farming is being carried on, soil drifting is at a maximum, and the damage is practically nil.

—In fields where strip farming is being carried on, soil drifting is at a maximum, and the damage is practically nil.

—In fields where strip farming is being carried on, soil drifting is at a maximum, and the damage is practically nil.

—In fields where strip farming is being carried on, soil drifting is at a maximum, and the damage is practically nil.

—In fields where strip farming is being carried on, soil drifting is at a maximum, and the damage is practically nil.

ORANGE PEKOE BLEND "SALADA" TEA

"Fresh from the Gardens"

Welcome Announcements.

The recent statement by Premier Bennett in the House of Commons in which he outlined the attitude of himself and his Government on the subject of reciprocal trade relations with the United States, and in which he declared that the United States was Canada's natural market, constitutes not only an important development in Canadian politics, but also an important development in moving, at least so far as the principle involved is concerned, this particular phase of the tariff question from the realm of partisan politics. Differences of opinion as to details of any such trade arrangement may exist or develop between the two great political parties in this country, but, so far as the question of the desirability of such an arrangement, it has now been quite plied.

To all those who feel that the important question of the tariff should, as far as possible, be removed from the arena of partisan political controversy, this unanimity of view will be most gratifying, as well as a most hopeful sign that at no distant date a marked improvement in the trade relations of these two great countries, having so many things in common, and divided only by a long and narrow frontier, will be clearly visible.

Premier Bennett made his momentous announcement when speaking to a resolution moved by a Liberal member, and which was worded as follows:

"That, in the opinion of this House, it is expedient that the Government of Canada re-open negotiations with the Government of the United States of America with a view of bringing about a satisfactory arrangement for the promotion of trade between the two countries, so that the natural products of Canada, that is to say, the products of the sea, the farm, the mines, and the forests, and including fish, lumber, wheat, cattle, etc., should have free entry into the United States in exchange for the admission of certain goods from the United States of America, which in the interests of both countries may be admitted into Canada."

Almost as great in its importance to Premier Bennett's statement, is the announcement contained in press despatches that the new Administration at Washington, under the guidance of President Roosevelt, proposes to make overtures to the Canadian Government looking to the negotiation of such a trade agreement or treaty. If, indeed, such overtures have not already been tentatively made.

Canadians generally will welcome these new developments, and nowhere will they be received with greater goodwill, and with sincere hopes that success will attend such negotiations, than in the provinces of Western Canada. Unquestionably, the continent of North America is one economic unit, however it may be divided politically and nationally. Nature made it so; geography and climate made it so.

The United States can supply Canada with many things we do not, and cannot, produce for ourselves—cotton, tropical and semi-tropical fruits, anathraeate coal, many articles of manufacture, to mention only a few examples. On the other hand, the United States is in need of enormous quantities of other natural products which Canada can supply in abundance. Why, then, should not countries exact taxes against the natural exchange of such commodities to the disadvantage of both?

Here in Western Canada we can raise tens of thousands of head of range cattle, but we are handicapped in finishing them for market, including the British market, and are at a distinct disadvantage in competing with the Argentine. But the United States is in need of a large number of fed cattle, and easily and cheaply reached by water transportation? Why should Ontario, lacking coal supplies of its own, be denied free and cheap access to the coal fields immediately to the south but in the United States? Why should other country cripple the natural flow of trade north and south, fighting geography in an unecological fashion, while striving for markets thousands of miles away?

It is admitted, almost universally, that the troubles which today beset the world are almost entirely of our own making, the result of our own blindness and stupidity, and not the fault of an all-wise Providence nor the breakdown of the immutable laws of Nature?

Canada and the United States have much to learn, and can learn much from each other. What is more natural than that Western Canada should ship thousands upon thousands of stocker cattle to the corn states to the south to be fattened for market? Both countries would profit thereby.

Why should the Maritime Provinces be forced to look for markets long distances inland in Ontario and Quebec, even to the West, with the rich mineral resources of the West? Why should we not have a coast to coast and, easily and cheaply, reached by water transportation? Why should Ontario, lacking coal supplies of its own, be denied free and cheap access to the coal fields immediately to the south but in the United States?

Why should other country cripple the natural flow of trade north and south, fighting geography in an unecological fashion, while striving for markets thousands of miles away?

It is admitted, almost universally, that the troubles which today beset the world are almost entirely of our own making, the result of our own blindness and stupidity, and not the fault of an all-wise Providence nor the breakdown of the immutable laws of Nature?

Canada's Shoe Industry

One of the Canadian industries to show increased production in 1932 was the leather boot and shoe factories. A corresponding decline was shown in imports of these commodities. In 1932 Canadian factories imported 17,870,218 pairs, while imports totalled only 343,965 pairs.

Great Britain has the highest taxation. France comes second and Germany third.

A \$1,250,000 paper mill is being built at Ellesmere, England.

Electric Eye Records Activity Of Housewife

Information Obtained By U.S. Bureau Of Home Economics

For each member of her family, the woman keeps a minute record every day to the kitchen sink, according to a February issue of the American Journal of Home Economics.

Each time she goes to the sink, the article she uses, she spends, on an average, one minute.

Thus, the homemaker in a family of five will average 90 trips daily to the sink and will work there for an hour and a half a day.

A photo-electric eye was used to help record every trip made, together with the time spent at the sink. The U.S. Bureau of Home Economics was asked to make this study by the National Council of Home Economics, one of the presidents' conferences on home building and home ownership, and it received outside co-operation.

An analysis of the study shows that the Washington, D.C., housewives in the income brackets studied were placed, spent from 58 to 102 minutes at the sink each day, the number of trips varied from 32 to 217. The reasons for such variation according to the article, can be determined from the following studies. The definite, factual data hitherto unavailable in such studies should make possible more definite conclusions as to the comparative efficiency of different types of kitchen arrangement. Dr. Stanley says.

Rich Gold Strike

New South African Field Opens Up

Another great gold strike—possibly equal to past rushes held and former depressions—was described to the American Institute of mining metallurgical engineers.

One of the world's leading mining engineers, Dr. W. Lee, estimates that the new field may be

as productive as the Consolidated Goldfield, South Africa. This dazzling estimate was reported by F. W. Lee, supervising engineer, geophysical and supervising engineer, geophysical section, United States Bureau of Mines, Washington.

It caps several weeks of reports in inside circles of New York that the African field might produce enough gold to start the ball rolling toward world prosperity.

Lee gives a brief history of the new African field, and says that the magnetometer located the ore.

"The greatest outstanding achievement of the year," said Mr. Lee, "was made by the engineers in the Consolidated goldfields. Here the sub-surface geophysical series was started from Mafikeng through properties of the Westward area, a distance of from 30 to 40 miles."

Lee goes on to say that the new African field may be as productive as the Consolidated Goldfield, South Africa.

It is the first time that the new African field might produce enough gold to start the ball rolling toward world prosperity.

Lee goes on to say that the new African field may be as productive as the Consolidated Goldfield, South Africa.

It is the first time that the new African field might produce enough gold to start the ball rolling toward world prosperity.

UNITED ACTION IS NEEDED TO SAVE COUNTRY

Ottawa.—Recovery from economic stagnation can come only if a sense of action and unity of action could be made possible, or at least hastened, by a National government, Sir Arthur Currie, principal of McGill University, Montreal, said at a gathering of McGill Ottawa Valley group.

"All our scattered forces must be combined to lead us out of the mass of doubt and even despair," said Sir A. Currie. "It is extremely doubtful in my judgment that if our desired objective can be reached by a politically divided country."

"Unity of all, for the good of all, would seem to be our surest and safest guiding force. We had to meet in a spirit of complete frankness. We met it with unity. In that troubous time all party prejudices, bages and slogans were forgotten or submerged and as a people we moved forward in one solid front to victory, not otherwise could we have success."

The present situation was most perplexing and serious than that of 1917, when the languid and apathetic and educated, in a time of peace, prejudices, bages and slogans were forgotten in a united effort to move towards prosperity, security and stability.

"There is stagnant industry," he said, "biting business, distress, despair, all urgently demanding redress. And redress can come only from unity of action which can be made possible, or at least hastened. I believe, by a National government, representing all the forces and all the thought of the country."

The establishment of such a power would mean sacrifice, a spirit of give and take, a measure of temporary control, but to the end it would be safe. In the present case our political weaknesses has been the fact we are all interested in voting for or against someone, rather than for or against something."

No party, no party group or policy was to be implied from his views, Sir Arthur stated. The times called for strength and national distress pointed to a common objective, relatively divergent views could be agreed upon the need of immediate action.

If the depression continues there was a danger of all sorts of quick remedies being accepted and applied through legislation or by a hysterical mob. On Canada had been cut from one fool's paradise and should be careful not to grope her way into another "following a will-of-the-wisp guide."

Bill Goes To Senate

Federal House Fases Measure Extending Ten Per Cent Salary Cut
Ottawa.—It is to be expected the civil service salary reduction for another year passed all stages of the House of Commons and was sent to the senate. The measure continues the 10 per cent. reduction in the salaries of civil servants and members of parliament until the end of the fiscal year 1933-34.

About 60,000 people would be affected by the 10 per cent. salary reduction, it was estimated. The civil service salary reduction for another year passed all stages of the House of Commons and was sent to the senate. The measure continues the 10 per cent. reduction in the salaries of civil servants and members of parliament until the end of the fiscal year 1933-34.

The civil service salary reduction for another year passed all stages of the House of Commons and was sent to the senate. The measure continues the 10 per cent. reduction in the salaries of civil servants and members of parliament until the end of the fiscal year 1933-34.

Salaries below \$1,200—16,408. Salaries between \$1,200-\$2,000—22,745.

Salaries between \$2,001-\$3,000—6,123. Salaries between \$3,001-\$4,000—1,579. Salaries between \$4,001-\$5,000—401. Salaries over \$5,000—215.

Royalty See First Talk

London, Eng.—The king and queen have seen their first talk on movie and apparently enjoyed it. It was the premiere of the screen version of J. B. Priestley's "The Good Companions" shown as a benefit for the unemployment relief fund. The performance was decided a great success, the profits totalling about \$40,000.

Predict U.S.-Jap War

Richmond, Va.—Asserting that the United States and Japan are destined to meet in a future war, General William Mitchell, former chief of America's army air service, recommended the mobilization of air power in Alaska.

Indian Goes Modern

Now Taking His Place In Affairs Beside the White Man

Ottawa, Ont.—The Indian has gone modern, entering professions, graduating from universities and taking his place beside the white man in business and politics, said Mr. J. J. Murphy, Minister of the Interior, told the House of Commons today. But the Indian retains all his williness and adroitness—he often refuses to be compelled to pay his taxes, he is not subject to legal action and taxes. The Indian, as the ward of the Dominion, pays no taxes, has no vote, cannot be sued in a civil court, and "is cut out to the teeth," said Mr. Murphy.

"That is the situation," said Mr. Murphy. "It is extremely doubtful in my judgment that if our desired objective can be reached by a politically divided country."

"Unity of all, for the good of all, would seem to be our surest and safest guiding force. We had to meet in a spirit of complete frankness. We met it with unity. In that troubous time all party prejudices, bages and slogans were forgotten or submerged and as a people we moved forward in one solid front to victory, not otherwise could we have success."

The establishment of such a power would mean sacrifice, a spirit of give and take, a measure of temporary control, but to the end it would be safe. In the present case our political weaknesses has been the fact we are all interested in voting for or against someone, rather than for or against something."

No party, no party group or policy was to be implied from his views, Sir Arthur stated. The times called for strength and national distress pointed to a common objective, relatively divergent views could be agreed upon the need of immediate action.

If the depression continues there was a danger of all sorts of quick remedies being accepted and applied through legislation or by a hysterical mob. On Canada had been cut from one fool's paradise and should be careful not to grope her way into another "following a will-of-the-wisp guide."

Price Remains the Same

Radio License Will Be Two Dollars For Another Year

Ottawa, Ont.—Radio licenses will remain at the \$2 figure for another year, Hon. Alfred Duranseau announced in the House of Commons.

At the same time he expressed the hope the Canadian radio commission would limit programs to advertising produced-in-Canada goods or to Canadian advertising programs.

The important item on the air discussing radio estimates of the Department of Marine and in taking a wide range of topics. No decision had been made, the minister said, on the system of radio licenses to be issued this year although the object was to force every owner to pay his fee.

Mr. Duranseau said the department this year would be paid for 100,000 radio licenses at \$2 less the 40 cents commission, under the house to house canvass system.

Health Insurance

Edmonton, Alberta.—Only by a contributory health insurance scheme can the state meet the needs for all Alberta people to be secured according to the state medicine committee's report, tabled in the Alberta legislature by Hon. George Hadley, minister of health.

May Amend Game Act

Edmonton, Alberta.—A government bill to amend the Alberta Game Act, if accepted by the Alberta legislature will permit farmers to shoot game birds on their land in the province without a license. At present the farmer can only shoot game birds on his own property without a license.

World Postal Congress

Ottawa, Ont.—The World Postal Congress of the world postal union will meet in Ottawa from May 18 to June 29 to pre-congress to be held in Cairo, Egypt; congress to be held in Cario, Egypt; next February.

Protest Arms Embargo

Should Be Limited to Aggressor Opinions of China

Nanking, China.—It was officially announced that China was making representations to the League in connection with the British arms embargo against China and Japan.

Spokesman for the Chinese National Government foreign office said any Far Eastern arms embargo said by the League was waging war on China. "It is a colossal blunder and will have absolutely no effect on the present hostilities."

Tokio, Japan.—Great Britain's announcement of an arms embargo against China has been interpreted by Japanese authorities as meaning a handicap for China only. In official and business circles there has been uneasiness lest the embargo turn out to be only the first instance of pressure against Japan, with the possibility of eventual economic sanctions.

Fine For Honeymooners

Mussolini Cuts Wedding Fine

Rome, Italy.—Honeymooners have been streaming into Rome at the rate of 2,000 couples a month since Mussolini granted them reduced railroad rates.

Now, to be娶夫, or newlyweds' fares from anywhere in Italy have been increased. In that time 14,000 couples have visited the capital.

Pope Pius has received practically all the visitors. He gives each bride a kiss and each bridegroom a religious medal.

GERMANY TO TAKE MEANS TO SUPPRESS REDS

Berlin, Germany.—Adolf Hitler, German Goering, Minister of War, and Minister of the Interior, both in Hitler government, declared at a speech that the incendiary fire at the Reichstag building was meant to inaugurate a series of violent acts culminating in Communism.

For this reason, he asserted, the government was justified in promulgating its drastic decrees of the last few days, penalties for treason and harsh penalties for treason and have placed Communists under martial law.

Captain Goering declared the lives of Communists and Socialists were not endangered so long as they kept quiet, but if they did not, he said.

Chancellor Hitler, addressing a delegation of Nazi workers, promised to ameliorate the lot of the German workman so that Communist arguments no longer would have him.

The Nazi process of squelching Communism continued unabated, with hundreds of leading Communists undergoing arrests, while many others fled into hiding.

Extensive precautions were resorted to for the protection of railways, bridges and power stations. Numerous armed guards were posted.

Squadrons of armed storm troops in the brown Nazi uniform can be seen at any time marching through Berlin on autoless police duty.

About 9,000 are in service here. Throughout Prussia there are about 60,000 of them.

ARGENTINE TRADE MISSION IN ENGLAND

Dr. Julio Roca, Vice-President of the Argentine, is shown with General Sir Charles Harrington, G.O.C., when he visited the Aldershot Command in Hampshire. Dr. Roca is in England at the head of the Argentine Trade Mission seeking trade treaties with the Mother Country.

Called to Bar

Lady Chatterjee, wife of Sir A. Chatterjee, head of the Indian delegation which came to Ottawa to the Economic Conference last summer, has been called to the British Bar at Lincoln's Inn. Lady Chatterjee has been studying law for a number of years.

Millionaire Released

Chas. Boettcher Freed February 12, 1933, From Abductors

Denver, Colo.—Chief of Police Albert T. Clark announced that Charles Boettcher, 2nd, heir to millions, who was kidnapped February 12, had been released.

He was released after a trial and that no ransom had been paid.

Chief Clark said the 31-year-old broker was released from a motor car and immediately communicated with the home of his father, Claude K. Boettcher, 72, who had been held in Boettcher's home and the chief of police rushed there to question him.

Chief Clark said young Boettcher was in good condition when released.

Details of the kidnapping and ransom were not available but Clark said Boettcher had been released from the car on the outskirts of the city. Clark said he did not have full details of the release, but reiterated that no ransom had been paid.

Boettcher, prominent young Denver broker and member of one of the city's wealthiest families, was abducted by two men from his home at his home Sunday night, February 12, and held for \$60,000 ransom.

New Motor Law

Bill Introduced in Saskatchewan Legislature for Protection of the Public

Rexina, Sask.—Motorists responsible for an accident will have their licenses taken away until they pay any amount of money.

The bill, introduced by Hon. A. C. Stewart, minister of highways, provides for the death of one person or \$10,000 for two or more deaths, according to the bill brought into the legislature by Hon. A. C. Stewart, minister of highways.

The proposed act also provides proof of financial responsibility before an auto license is issued to any person under 21 or over 65 years of age, and makes the holder responsible for a motor accident.

The proposed act does not deny the plaintiff in any motor accident case from proceeding for remedy under any other section of the law.

Saskatchewan's proposed law on financial responsibility of motor owners and drivers is modeled after Ontario's.

The proposed act does not deny the plaintiff in any motor accident case from proceeding for remedy under any other section of the law.

Montreal, Que.—An important development in freight services on the Canadian National Railways is the opening of a new branch line from the Prairie Railways which will provide door-to-door pickup and delivery of freight shipments without extra cost to either shipper or consignee was announced by George Stephen, vice-president of the Canadian National Railways and Alistair Fraser, K.C., acting vice-president in charge of traffic of the Canadian National Railways.

The new branch line, which the management stated had completed contracts with approximately 45 trucking firms at cities and towns served by their lines in western Ontario, between Toronto and Windsor and Toronto and Galt, will provide pickup and delivery service to shippers at no extra cost. New tariffs embracing this feature will become effective this week.

The railways, it was emphasized, are not to be regarded as a new business. At some of the points affected by the new tariffs, they already have contracts with cartage firms for pickup and delivery of freight.

Under the plan, however, the service will be extended by arrangement with local trucking contractors, to points where pickup and delivery service did not previously exist.

The new door-to-door service will make available the service of such points and will make use, under contract, of existing cartage services instead of involving the organization of new facilities for that purpose.

Banning Allegiance Oath

De Valera in Position To Force Removal From Constitution

Dublin, Irish Free State.—In sixty days the oath of allegiance to the British crown will vanish from the constitution of the Irish Free State and become a dead letter in the Anglo-Irish treaty.

The Dail Eireann passed by a vote of 75 to 40 a government bill abolishing the oath of allegiance to the British crown. The measure now goes to the senate.

The constitution provides that bills which the senate refuses to pass in such a manner as to satisfy the lower House will, at the expiration of 18 months, become law despite the senate.

In the event the dail is dissolved in the meantime the waiting period is over and the measure becomes law. After the 1932 elections, when Mr. De Valera found himself heading the government for the first time he immediately attempted to remove the oath. He was blocked by the senate. He is to be again positioned by the senate, but is still faced with a possibility that this move will fail to satisfy left wing extremists, including the old Sinn Fein.

Royal Assent Given Bill

Authority Granted Manitoba To Borrow For Flood Control

Winnipeg, Manitoba.—For Manitoba to borrow money for the construction of unemployment relief and to lend money to municipalities for their share of relief costs, was granted the province when Premier John Bracken's bill was given royal assent.

Although the act as it was amended by Mr. Bracken provides for the province borrowing money without specifying the source of the loan, the premier moved an amendment in the House that later in the session the members will be asked to unanimously request the Dominion to make loans to the province.

Gun Running Plot

Senate Orders Gunsmen In Vancouver Leads Police To Investigate

Vancouver, B.C.—Seizure by police of six machine guns, disassembled and expertly packed in the back of a popular automobile and more than a dozen rifles, was the latest in a series of gunrunning incidents in Vancouver.

Authorities are attempting to trace the origin of the gunsmen, they said, and are making arrangements to have them used in operation there against the Japanese. No local trouble, police point out, could possibly call for the use of such a formidable array of guns and large amount of ammunition.

RAILWAYS WILL MAKE USE OF AUTO TRUCKS

Montreal, Que.—An important development in freight services on the Canadian National Railways is the opening of a new branch line from the Prairie Railways which will provide door-to-door pickup and delivery of freight shipments without extra cost to either shipper or consignee.

JAPANESE ARMY BREAKS DOWN CHINESE DEFENSE

Wu-chow, Manchuria.—Japan's invading forces breached through the strongest Chinese defenses, less than 70 miles from Jehol city.

The 16th Infantry under General Tadashi Kawahara forced into Lingyu, past the town of Sartung, five miles west, and right on to Peking, on the motor highway which leads to the capital.

General Kunio Matsuda, commanding the 11th Division, moved down from the north, marching captured Chieping, to join General Kenjiro Morige's fourth cavalry which was waiting at Chieping.

The cavalry took Chieping without a fight, when the Chinese came with their guns, the Chinese commander already had hoisted the flags of Japan and Manchukuo. Apparently he was willing to let them in with General Morige, who had moved in from the south.

Deputations from the capital said two Japanese planes had bombed the new airfield near the city. All through the night, stages of the attack were witnessed, some of them heavy, indicating that the broken Chinese forces are worrying the Japanese.

Part of the advancing forces are moving west along fairly good roads by motor truck and armored cars from Lingyu. Deputations reaching here indicated that should the resistance encountered be too strong, the Japanese will be forced to send tanks that have already overcome the Chinese.

General Tang Yu-Lin, provincial governor of Jehol, has given no sign of his intentions. The Japanese still have not been able to find him.

The result of the fighting in the mountains apparently is over but there have been skirmishes, some of them heavy, indicating that the Japanese are worrying the Chinese.

Predicts Many Earthquakes

Famous Seismologist Forecasts Disasters For This Year

A "rather agitated year" in the way of earthquakes, with especially great tremblers in Alaska and the Greater Antilles, is the forecast for 1932, says Dr. Barendan, the famous seismologist.

Known as "the wonder man of Faenza," Dr. Barendan, head of the Geodynamic Observatory of Faenza, is noted for the amazing accuracy of his forecasts and his predictions. His forecast, for example, a quake in eastern America for early in March, 1932, on March 2 of that year New Yorkers noted prolonged earth tremors.

Although several important quakes are forecast for this year, in widely separated regions of the earth, Dr. Barendan states that the movements in the earth's surface will avoid the most populated areas, thus preventing a repetition of the Messina and Tokyo catastrophes.

"In February in Alaska and the Greater Antilles, there will be an outbreak which will reach the proportions of an appalling manifestation," Dr. Barendan told International News Service.

"Throughout the southern chain of the Andes mountains in South America, Madrid there will be sudden threatening shakings of dormant telluric energy."

"In April the earth will tremble in far-away China."

"In May there will be bad news from Mexico."

After that, he said, there will be months of seismic quietness, when Venus will once more visit one of his most famous stamping grounds, Nootka Sound.

"The Balkan peninsula will shake in September," went on Dr. Barendan. "Finally there will be a few other quakes in Turkestan and India before the end of the year."

Remembered His Friends

Requests Left By Toledo Artist Provide Annual Birthday Gifts

Begins to be given to fifty-nine friends annually on their birthdays, with gifts for purchase at Toledo, Ohio.

The late Frank J. Neel, art connoisseur, miniaturist and member of an old Toledo family who died Jan. 29, named seven friends as beneficiaries who are to receive a gift every year on their birthdays as long as they live.

The will also provided for gifts of \$100 each to two other friends to be distributed each year on their birthdays as long as they live. It was stipulated that \$100 bequests were to be given to the Toledo Art Association to be distributed to the estate of the charitable foundations.

All of the estate's beneficiaries live in Toledo except Beatrice Fife of Hartside, N.Y., who is listed among those who are to receive \$100 annually.

Age Determined By Hair

Scientist Claims It Has Conclusive Rings Like Trees

A method has been devised to determine the age of a person by examination of a single hair was demonstrated before the convention of the International Association of Identification by Calvin Goddard, of the scientific criminal department of the University of Western Ontario at London.

The method depends upon the discovery that when powerfully magnified, the hair reveals a system of concentric rings something like the family rings of trees. This is the newest method of scientific dating.

Working on Perfect Mirror

Science comes a step closer to the perfect mirror, one which will reflect light without loss of intensity, as metal surface announced in the Physical Review by Hiram W. Edwards, of the University of California. These mirrors, he says, should be of considerable interest to the scientific instruments where front surfaces of high reflecting power are desirable.

All In The Same Boat

The (armist's) interest could never be really so great that the world would not be interested in a common ruin, and the early hope of the one is the hope of the other. This is in the increased demand which follows improved trade; and the improvement in trade, to be effective, must be world-wide. —London News Chronicle.

A Munich professor has taught fish to respond intelligently to sounds and colors.

BRITISH GOLF QUINTET AFTER NEW HONORS

Our picture shows the happy golfing quintet from the Mother Country who have arrived on these shores to compete in some of the major United States' women's golf tournaments. The British golfers, reading from left to right, are: Miss Kathleen Garsham, Miss Diana Fishwick, Miss Betty Dix-Perkin, Miss Gwen Hartopp and Miss Barbara Pyman.

Wanted To Conserve Trees

late Frank J. D. Baranjum Saw Danger In Forest Depiction

Frank J. D. Baranjum, who died in Paris a few weeks ago, was Canadian author and author of active business.

After retiring from business about ten years ago, he set aside half his fortune for a one-man campaign to conserve the Dominion's forests.

His death occurred when he was returning from Italy, where he had inspected Premier Mussolini's gigantic forest system. He had gone to Italy on invitation of the chief of the country's forest service.

He had been writing to the Queen of England, the King of Spain, the King of Norway, London, Paris, the Hague or Berlin, he talked trees. Sometimes he became disgusted with "the cold-blooded indifference of Canadians to their forests," he said.

He had been invited to speak at the annual meeting of the American

Foresters Association for 1932.

"The Balkan peninsula will shake in September," went on Dr. Barendan. "Finally there will be a few other quakes in Turkestan and India before the end of the year."

Englishman Fyles Challenge

Hubert Scott-Paine Will Race Garwood For Harrows Trophy

Hubert Scott-Paine, English motor, boat designer and engineer, has taken up the task of wresting supremacy on the water from Gar Wood and fled a challenge for the Harrows trophy for 1933.

The challenge was issued by the

Automobile Association of America, which holds the trophy for Wood, though the Royal Motor Yacht Club of England. The races will be run at the Royal Motor Yacht Club of England.

The races will be run at Detroit, Sept. 2, 4, and, if necessary, on Sept. 5.

He will name his new boat Miss Britain III, and will power her with a 1,350-horse-power motor of the supercharged type used in the British Schneider cup seaplane for several years. He has agreed to pay a fee for the details but said his hull would be a new and "unorthodox" design.

Denied Double Income

Request For Newly Married Divorced Women Has Been Rejected

The time honored question as to whether two can live as cheaply as one may be applied to Swedish royalty. E. Wigforss, Finance Minister, declined to approve an additional allowance of 100,000 kronor for the 29-year-old Prince Gustaf Adolf, who was married last October to Princess Sibylle, of Germany. The 29-year-old prince already had 90,000 kronor a year, but his marriage, it is claimed, does not require an additional allowance.

The royal family is refused in the Wigforss budget by \$16,000 through cutting household expenses at the castle.

A Real Handicap

Plasterers assert that we shall pull through because our forefathers did when they pioneered this country. We shall pull through, of course, but the argument is flimsy because the pioneers did not have to move too many governments, too many railroads and too many high-salaried commissions. Farmer's Ad-

Many Patents Issued

The Boston Transcript says in 1923 the U.S. Government issued eleven thousand more patents than in 1921 all for mechanical contraptions, and not one, apparently, for perfecting the nature of mortal man to fit him to live them well and for the benefit of the entire race.

More than 7,000,000 new matches were made in Portugal last year.

Has Not Changed Course

Survey Proves Idea About Gulf Stream Is Wrong

It has been believed about often in recent years that the Gulf Stream, by shifting its course, has managed to change the climate of the eastern part of North America continent, bringing milder winters than our neighbors, or their grandfathers, enjoyed. Recent winter weather, however, still, generally speaking, though perhaps not yet accurately can remember the rigors of the winter of 1917-1918. Mild winters or severe ones, the Gulf Stream cannot be blamed, we're told.

A little research carried out by the officers of the British destroyer "Saguenay" in the course of that vessel's passage to the West Indies confirmed the theory that the Gulf Stream does not move to the north.

When the Gulf Stream was first charted, the New York Sun points out, have previously had frequent assurance from their own surveyors that the Gulf Stream had not changed was not changing, would not change.

Indomitable believers in the powers of the Gulf Stream may maintain that the Gulf Stream, notoriously sly and wily, received advance information of the intentions and movements of the surveyors to perplex a harassed and bewildered world. To some that may seem plausible; that famous ocean current has been invested with so many remarkable qualities that it only seems logical to suppose that it can do what it wants.

The surveyors, we're told, think of the Gulf Stream as capable of spoofing unimaginative surveyors of the deep.

St. Thomas Times-Journal.

Animal Mystery

How Tailless Cats Got To Isle Of Man Is Puzzle

One of the many mysteries of animal migration is how the Manx cat, one of which is being sent to the Prince of Wales' farm in Nottinghamshire, has got to the Isle of Man.

They certainly aren't natives of Man—cats of the same breed are encountered in many parts of Russia, and their original home is believed to be farther east, perhaps in Japan. They are not native to Man, however, and the tailless cats are rare in that country and in China. But how the tailless cats got across the world to the Isle of Man is a puzzle. —London Answers.

Modern girls have something in common with their grandmothers, they love spinning wheels.

Savings deposits in Germany are again mounting.

Clever At Embroidery Work

Prince Of Wales Not Only Man To Take It Up

Men may be surprised to learn their overwhelming desire to embroider. The Prince of Wales has done it, and no one need be afraid to follow in his wake. The prince used to knit when he was a small boy and lately he has learned to sew. He has a collection of petit point pieces of art in the medium which is an attractive background board, which was on view at a recent exhibition in London. It has a color scheme of red, blue and fawn. Silk was used to make the embroidery for the half-diamond design in petit point and half-stitch.

Many men may embroider on the sofa, Lord Clarendon does it quite easily. On the voyage to South Africa two years ago he took a hand at the embroidery frame on which the map of Africa was growing.

Lord Hyde, too, could be seen stitching busily in the hottest parts of the day. The princess royal's husband, Lord Harwood, is another skilled embroiderer.

May Take Action

Government May Consider Amendment To Judgments Act

The Federal Government is understood to be considering an amendment to the Judgments Act providing for the automatic retirement of king's bench and appeal court judges at the age of 75 years.

The proposed amendment, in principle, is that it only applies to the chief justice.

It is not yet decided. Judges of other courts retire by law when 75 years old.

Important Sweepstakes

The British Columbia Hospitals

Associated has voted 77 to 29 in favor of government-controlled sweepstakes for the benefit of hospitals. The vote was authorized by the annual meeting of the association in Vancouver last fall.

Germany Boosts With Britain

It would be suicide for any British Government to accept an American demand for stabilizing sterling, says the Bank of England director, Sir Josiah Stamp, in an interview in the *Berlingske Tidende* of Copenhagen.

He adds: "The question of the future of sterling is to be discussed at the world economic conference at London, England, but never will be decided from Washington."

Associated has voted 77 to 29 in favor of government-controlled sweepstakes for the benefit of hospitals. The vote was authorized by the annual meeting of the association in Vancouver last fall.

FANCIFUL FABLES

Canada's Tobacco Industry

Cigarettes Form The Main Item Of Tobacco Production

The most popular form in which tobacco is used in Canada is in cigarettes. An analysis of the tobacco manufacturing industry in Canada for 1932 shows that just as was caused by the Canadian Government Budget. It shows that in the year under review the total production of the industry was valued at \$74,926,154, a decrease of 12.5 per cent. The value of tobacco in 1931 was \$84,359,517, an item that goes to make up the aggregate value of the output was cigarettes to the number of 4,431,583,000 valued at \$42,863,121. The number is about 48,000 for every man, woman and child in the Dominion, and if placed end to end would extend approximately 160,000 miles or enough to girdle the earth more than seven times. The total cigarette output of Canada is 17,075,606 pounds valued at \$18,883,098. Cigars, with a production of 155,412,000 valued at \$7,247,112, come next. Chewings, tobacco, while not as popular in Canada as in the Dominion, and if placed end to end would extend approximately 160,000 miles or enough to girdle the earth more than seven times. The total cigarette output of Canada is 17,075,606 pounds valued at \$18,883,098. Cigars, with a production of 155,412,000 valued at \$7,247,112, come next. Chewings, tobacco, while not as popular in Canada as in the Dominion, and if placed end to end would extend approximately 160,000 miles or enough to girdle the earth more than seven times. The total cigarette output of Canada is 17,075,606 pounds valued at \$18,883,098. Cigars, with a production of 155,412,000 valued at \$7,247,112, come next. Chewings, tobacco, while not as popular in Canada as in the Dominion, and if placed end to end would extend approximately 160,000 miles or enough to girdle the earth more than seven times. The total cigarette output of Canada is 17,075,606 pounds valued at \$18,883,098. Cigars, with a production of 155,412,000 valued at \$7,247,112, come next. Chewings, tobacco, while not as popular in Canada as in the Dominion, and if placed end to end would extend approximately 160,000 miles or enough to girdle the earth more than seven times. CLERK - PHONE 9TOWN & COUNTY
PersonalographsMr. Colin McPherson returned from
Calgary on Saturday after spending
the past month at that point.Mrs. S. Poxon and Son spent the
week end in Calgary and returned on
Sunday evening.Norman Nash and Harold Edwards,
who are attending Mount Royal in
Calgary, spent the week end at their
respective home in Carbon.Mrs. W. Poxon was a Calgary visitor
on Tuesday of this week.Mrs. McPherson of Carbon, spent
Tuesday evening in Carbon. On Tuesday evening
at the home of Mrs. H. Wilson,
she presented the charters to both the
senior and junior LODGE groups which
were organized recently in Carbon.Touring Lent services will be held
in the Anglican Church every Thursday
evening at 8 o'clock.Don't forget the LO.D.E. dance to
be held in the Farmers' Exchange hall
tomorrow night, March 10th.The Carbon hockey team motored to
Drumheller on Sunday afternoon, to
play the Midland team, but the team
was too sick. After playing the first
period, the game was called off, probably
until next winter.Children's services and Sunday
school will be held in the Anglican
church on March 12th, at 10 a.m.—Do you owe any accounts at The
Carbon Chronicle office? If so, we
would appreciate an early settlement.Don't attempt to be printers. It does
not pay you in the end. Instead, have
your local poster and other printing
done at the Carbon Chronicle office.Want a Cook

Let Us Do Your
Printing?

All business houses need more or less printed matter, all of which
is within the possibilities of the local printer. Yet how prone
many are to pass up the home printer and let the orders go to
city offices which have no interest whatever in rural communities
except to get printing orders and the cash to pay for them. Busi-
ness men, remember that the home paper is constantly prom-
oting the interests of the home community and you owe it to your-
self and your local paper to back up these efforts by at least hav-
ing your printed matter done locally.

WHEN IN NEED OF PRINTED MATTER CONSULT
